Reference Range Change

Dear Valued Client,

Effective 09/24/2015, National Jewish Health Advanced Diagnostic Laboratories will be making changes to the reference ranges for the following test. Please note the correction highlighted below as a follow up to the notification dated July 24, 2015.

1. Test name: Anti-IgE receptor antibody

Test code: IGERAB

New reference range reported as < 13% of basophils*

*Note normal control value is \leq 12% of basophils

Reference: National Jewish Health Advanced Diagnostic Laboratories reference range developed from analysis of serum collected from 80 healthy subjects.

Please contact our Client Services team at 800-550-6227 with any questions. This information is also available at njlabs.org.
