Research Areas

- Basic Immunology
- Inflammation
- Innate Immunity
- Molecular Genetics

Special Interests

Diseases of the immune system such as sepsis, asthma, and atherosclerosis affect millions of people worldwide, and the incidence of many of these diseases is rising. My lab is focused on understanding the regulation of the innate immune response, particularly as it relates to the basis for such immunological diseases.

Education

Education

1996 Harvard University

Academic Affiliations

Associate Professor in the Department of Immunology and Microbiology, University of Colorado Denver
