

Dr. Jessica Galant-Swofford Joins National Jewish Health Immunology Team

OCTOBER 20, 2021

DENVER, CO — [Jessica Galant-Swofford, MD](#), has joined the allergy/immunology faculty at National Jewish Health in the Division of Allergy and Clinical Immunology where she is focused on enhancing the care of patients with immunodeficiency and immune dysregulation and establishing a clinical research program.

Dr. Galant-Swofford comes to National Jewish Health from the University of California, San Diego, where she completed her fellowship in Allergy and Immunology. She specializes in the care of patients with primary immunodeficiency diseases such as common variable immunodeficiency (CVID) and patients with secondary immunodeficiencies such as those caused by cancer and immunosuppressive therapy. Dr. Galant-Swofford sees patients at the National Jewish Health main campus.

Dr. Galant-Swofford received her medical degree from the University of California, Irvine School of Medicine, and completed her residency in Internal Medicine at the University of California, San Diego. Her research focuses on the inflammatory and autoimmune complications of immunodeficiency diseases, including chronic lung and gastrointestinal disease, as well as how the microbiome may inform the treatment of these conditions. She has authored numerous peer reviewed journal articles and is a member of the American Academy of Allergy, Asthma, & Immunology and the Clinical Immunology Society.

National Jewish Health is the leading respiratory hospital in the nation. Founded 125 years ago as a nonprofit hospital, National Jewish Health today is the only facility in the world dedicated exclusively to groundbreaking medical research and treatment of children and adults with respiratory, cardiac, immune and related disorders. Patients and families come to National Jewish Health from around the world to receive cutting-edge, comprehensive, coordinated care. To learn more, visit the [media resources](#) page.

Media Resources

We have many faculty members, from bench scientists to clinicians, who can speak on almost any aspect of respiratory, immune, cardiac and gastrointestinal disease as well as lung cancer and basic immunology.
